### Agenda Item 7 – Dental Hygiene Prescription Ad Hoc Committee Report

Mr. Biggers requested the following report be part of the official minutes:

“Let me first say that I have been very honored to have chaired this Prescription Ad Hoc Committee. I have found it very fascinating and enlightening to learn so much about Dental Hygiene and all of its characteristics involved in the profession of the Dental Hygienists in Alternative Practice.

I would like to, on behalf of RDHAP’s in California, request from the board the removal of the prescription requirement from a licensed dentist or a physician /surgeon in order to perform services to the state’s most vulnerable patients.

There are many people in the state that do not have a dentist or physician, making it virtually impossible for them to get a prescription. Also, doctors and dentists are not often prompt in responding to an AP’s request for a prescription to provide Dental Hygiene services for patients they do not know, thus leaving the patient with no dental care at all.

In California, approximately 3 million residents suffer from a lack of access to care. This number is startling. Californians must have the ability to get basic Dental Hygiene care without having the extra burden of going to a dentist / physician /surgeon to obtain a prescription for this care. The prescription requirement is a barrier which affects the entire industry. Lifting the requirement will allow for Californians in need of dental

hygiene services to receive services promptly. It will also enhance the dental profession as a whole because of the hundreds of referrals dentists will receive from RDHAP's due to the limited scope of practice which allows only the performance of duties under their license scope of practice.

Under the Health Manpower Pilot Project, it is well noted and documented that for 16 years, there has been absolutely no documented evidence showing harm to the public. For 16 years, the pilot project has lived up to its expectations mandated by the state and therefore the prescription requirement should be removed. I can say as a public member of this board, protecting the public is my number one reason for being here. By lifting this requirement, I firmly believe the public safety aspect is in tact. RDHAP's are licensed professionals who deserve the opportunity to get out from under the cloud of having to plead with a dentist or doctor or negotiate with a professional association to allow them to perform their duties under their scope of practice.

In the past year as a board member, I have seen countless dentists who have done harm to the public. In the past year, I have yet to see one RDHAP up for disciplinary action. This tells me that RDHAP's take their profession seriously, and can be trusted to perform their duties in a safe and appropriate manner.

I trust the board has taken the time to read all of the letters the RDHAP's have sent to us, that each of you feel the passion these professionals hold in regards to being able to give care, listened to them at the November meeting in Sacramento and understand that they are committed to doing what they love to do while following the requirements of their scope of practice.

State Law has given enabling legislation to RDHAP's under the Business and Profession Code. RDHAP's are empowered to perform under their scope of practice and it serves the state well to have RDHAP's perform their services in underserved communities, as well as for home bounds, nursing homes, and assisted living arrangements. It is a win-win for the citizens of our state. Those who oppose this action are in my opinion keeping the interest of public health from being met. This is an opportunity for a dentist to have a real partnership with RDHAP's instead of a subordinate type relationship that continues to build barriers.

After studying this particular item for the past few months, I am positive that public safeguards are in place and the people of the state of California are in good hands.

Thank you for your participation on this committee.

I move to recommend removal of the RDHAP prescription requirement. Is there a second?"

Mr. Kevin Biggers recommended the board's support of COMDA seeking a legislative change to have the prescription requirement uplifted.

It was voted 5/4 not support the recommendation of the committee.

COMDA Chair, Ms. Shanda Wallace requested a letter of justification for denial of support on this issue.

Norine Marks, Legal Counsel

The meeting was called to order at 1:45pm. All members of the committee except for Ms. Klein were present and a quorum was established.

AGENDA ITEM 9.1 - The minutes of the November 5, 2004 were approved with the following amendments:

14.7 – states that Ms. Mitchell will be working with Legal on establishing a ~~Parental Consent Policy~~. Ms. Marks clarified that the issue is much broader than developing a parental consent form. The policy is for the Use of Minor Patients for Exams.

### AGENDA ITEM 9.4 – Dental Exam Statistics

The Pass/Fail Statistics for the November 13<sup>th</sup> and 14<sup>th</sup>, 2004 Restorative Technique Exam were provided as information only.

### AGENDA ITEM 9.5 – Auxiliary Exam Statistics

The historical examination statistics for each of the auxiliary examination programs were provided as information only.

Dr. Gordon requested the Committee on Dental Auxiliaries (COMDA) provide the committee with a report as to the underline reasons for the low pass rates. Ms. Karen Wyant, Executive Officer of COMDA, informed the committee that a report was submitted last year stating some of the underline reasons for the failure rate, but to come up with a definitive reason would be very difficult. COMDA has ensured that their exams are valid, the examiners are extremely well trained, and that the exams are consistent and fair.

Ms. JoAnn Galliano expressed her concern with Dr. Gordon's request. She stated that the dental exam statistics are just as low as the auxiliaries and that the committee should be looking at the reason for low pass rates across the board and not just for auxiliaries.

Ms. Cathy Mudge representing the California Dental Association (CDA) believes Dr. Gordon asked a fair question. The passage rate for dental exams and the hygienists exam have gone up. Looking at the RDA's pass rate, you have to ask some simple questions, i.e., why is it that only half of the candidates are passing exam. Is it the quality of the candidates? Is it the quality of the exam? Or is it something else. We would like to see as many RDAs pass the exam as possible.

AGENDA ITEM 9.6 – Review of Western Regional Examination Board (WREB) Regulation

Ms. Cynthia Gatlin informed the committee of the status of the Occupational Analysis that is being conducted by the Office of Examination Resources (OER) as part of SB 1865. To date, OER has conducted approximately 12 interviews with dentists practicing in CA. The OER anticipates conducting a total of 20 interviews by the end of January. The next phase is to conduct workshop-style meetings to review the background information collected. The OER is presently recruiting subject matter experts (licensed dentists) to participate in these workshops.

Mr. Richard Decuir explained the fee estimates for WREB candidates to apply for CA Dental License and the CA Law and Ethics exam.

It was m/s/c (Gordon/Kaye) to set for regulatory hearing.

Public Comments were given by Ms. JoAnn Galliano of CDHA, Ms. Cathy Mudge of CDA, Dr. Bonnie Morehead, Dr. Earl Johnson, and Ms. Gladys Mitchell.

The meeting adjourned at 2:40 pm.
